**Prosport Inc.**

**EVO Series Boost Gauge**

**Blue / Red Display**

---

**Wiring Instructions**

- **Red Wire**: 12v Accessory Power
- **White Wire**: 12v Accessory Power
- **Black Wire**: Ground
- **Orange Wire**: 12v Headlight Switched Power
  (This is a power source that only gets power when headlights are on)
- **Green Wire**: Connects to the White wire from the boost sender

---

---

**Cut boost line and install supplied plastic “T” fitting. Connect “T” fitting to In-Line Filter with supplied hose. Then connect In-Line Filter to sender with supplied hose.**

---

**Digital Boost**

*Note: Do not over tighten these bolts.*

---

**Very important to keep foreign material out of the boost sender.**

---

**Boost line**

- **Black**: Ground
- **Red**: 12v Accessory Power
- **White**: Green wire from gauge

---

**Do not over tighten bolts when installing U bracket. Doing so will cause damage to movement inside.**
