**Power Wire**

- **Red:** 12v Constant Power (power all the time)
- **Black:** Ground
- **Orange:** Headlights or taillights (A power source that only has power when the lights are on.)
- **White:** 12v Ignition power (Power with key on)

**Daisy chain**

This Power wire will connect to the next gauge if installing more than one gauge.

2mm Allen wrench elevation adjustment. This can be used to zero out the gauge at high elevation

**Inline filter**

Sensor Wire

Boost sensor

The Sensor wire from the Gauge to sensor is a plug in Play Design, no cutting or splicing is needed.

**IMPORTANT**

The boost sensor is not water proof
We HIGHLY recommend keeping the sensor in the interior cabin.

**The inline filter is very important**
It prevents debris, dirt and oil from entering the sensor.
